5-Step Resort Guest & Runner Operating Cycle

A seamless end-to-end hospitality loop ensuring every poolside order is prepared accurately, billed securely, and delivered straight to the guest's sunbed without friction.

Visual Digital Menu Explore high-res tropical drinks, dietary badges (Vegan, Gluten-Free, Halal), ice levels, and sunscreen or towel requests.	03. 1-Tap Folio Charge Guest enters room number and last name. PMS verifies active stay and posts balance to room ledger, or guest pays via card/UPI.
04. KDS Zone Routing Pool bar receives drink tickets; kitchen receives food items. Exact location ID ("South Beach • Daybed 14") prints automatically.	05. Express Lounger Drop Resort runner delivers refreshments straight to the daybed. Order marked complete on runner tablet; digital receipt emailed to guest.	06. Automated Tip & Ledger Gratuity splits automatically among outdoor team. Nightly audit reconciles room charges with PMS folio in 0 discrepancies.

Enterprise Hotel PMS & Room Folio Integration

Eliminate credit card pre-authorizations and wet cash at the poolside. Smart QR Order synchronizes directly with your resort property management software:

PMS Feature	How It Works in Smart QR Order	Resort Operational Benefit
Room Authentication	Guest validates order using room number + surname or secure OTP sent to their registered WhatsApp / email.	Prevents unauthorized room charges from non-guests
Real-Time Ledger Post	Itemized beverage and dining totals post immediately to the guest folio line-item with timestamp and location tag.	Zero billing disputes upon guest checkout
Multi-Currency Support	Foreign travelers view prices in their home currency (USD, EUR, GBP, AUD, AED) while billing ledger settles in local INR.	Enhanced international guest transparency and comfort
Spending Limit Safeguards	Front desk sets optional daily poolside charge ceilings per room (e.g. ₹15,000/day for family suites).	Prevents unexpected credit exceedances
RFID Wristband Link	All-inclusive resort guests tap their NFC/RFID wristband on runner handheld to verify package entitlements.	100% accurate VIP and all-inclusive auditing

Loungers with active orders glow in vibrant emerald.	■ Dynamic Prep Timers Bar and kitchen screens display elapsed preparation timers.
